

#### Anthropology

#### ANT 122 Introductory Anthropology (3 Cr.)

This course focuses on the variety found in the human condition around the world and the evolutionary biological study of human social behavior. It covers all aspects of humankind and other primates in all places and times. Archaeology, cultural anthropology, linguistics and physical anthropology and their relationship to human beings will be discussed.

No prerequisite.

#### ANT 214 Human Evolution (3 Cr.)

This course provides an overview of the fossil and archaeological evidence for human origins, theory and method in paleoanthropology are emphasized. Furthermore, in this course we will explore the fascinating field of biological anthropology and its underlying mechanisms that allow scholars to construct our historical past (human origins) using evidence from several fields such as genetics, paleoanthropology, archaeology, geology, ecology, zoology and comparative primate morphology.

No prerequisite.

## ANT 219 Environmental Anthropology (3 Cr.)

This course introduces students to the various ways in which anthropology has sought to understand human-environment relations, both from utilitarian perspectives (such as cultural ecology, ethnoecology, and political ecology) and symbolic ones (where anthropologists have focused on the meanings people give to the non-human world).

No prerequisite.

#### Art

#### ART 115 Modern Art History (3 Cr.)

This course is an introduction to the western contemporary art that comprise 19th- and 20th-century modern art. It will be a detailed survey of the beginning of art, including painting, sculpture, architecture and photography as well as recent developments in the idea of medium such as conceptual art. The focus will be heavily theoretical, but it will also require students to acquire some basic historical knowledge of contemporary events.

No prerequisite.

#### Communications

#### COM 303 Intercultural Communications (3 Cr.)

This course provides an introduction to intercultural communication theories and methods. It covers barriers to successful communication that involve cultural differences and focuses on the application of theory and research to intercultural communication. The influence of cultural elements on individuals, groups, and organizations will also be discussed.

Prerequisite – ENG 111, ENG 112

#### COM 305 Writing for the Internet (3 Cr.)

This course is designed for the learning of the principles, research, and practices of creating and publishing work on the cyberspace. It also will cover the principles of and research on effective Web rhetoric as well as explore Internet publications that most resemble traditional print publications.

Prerequisite – ENG 111, ENG 112

#### COM 500 Managerial Communication (3 Cr.)

This course examines the roles of communication networks and strategies in managerial decision making. It studies the challenges exist for creating and implementing effective communication both inside and outside organizations. It also focuses on the role of the communication skills in managing change, organizational conflict, and corporate cultures.

Prerequisite – Permission from Instructor

#### **Computer Science**

## CSC 121 Computer Science I (3 Cr.)

This first course in computer science develops foundational skills in computer programming to an audience with no prior computer experience. It introduces the process of developing algorithms to solve problems, and the corresponding process of developing computer programs to express those algorithms. Specific topics covered include the following: expression of algorithms in pseudo code and a programming language and functional and imperative programming techniques.

No prerequisite.

#### CSC 122 Computer Science II (3 Cr.)

This course continues introduction to basic computer science concepts begun in Computer Science 1. Essentially, this course covers the use of object-oriented programming to design and implement software solutions. Concepts taught include pointers, classes, operator overloading, inheritance, and polymorphism and a high-level language will be used as a vehicle for the further development of these concepts.

Prerequisite – CSC 121

#### CSC 210 Database Management (3 Cr.)

This course covers fundamentals of database architecture, database management systems, and database systems. It focuses on the development of well-formed databases for the purpose of data management from the initial design of the database to the implementation and query. Web based database applications are also introduced.

Prerequisite – CSC 122

#### CSC 211 Introduction to Digital Logic Design (3 Cr.)

This course introduces the basics of electronics and digital systems and is designed to expose students to engineering design and troubleshooting techniques that are used in the electronics field. It covers the basic methods for the design of digital circuits and provides the fundamental concepts used in the design of digital systems. Emphasis is placed on computer components such as adders, comparators, multiplexors, memory, counters, and bus-related circuits.

Prerequisite – CSC 122

## CSC 224 Principles of Programming Languages (3 Cr.)

This course covers the fundamental concepts underlying design of programming languages. It focuses on the formal specification of programming languages such as: syntax, analysis, and semantics; evolution of programming languages and concepts; names and scope; data representation; evaluation sequence at expression, statement, and subprogram levels.

Prerequisite – CSC 122

#### CSC 261 Introduction to Algorithm (3 Cr.)

This course introduces the techniques for designing efficient computer algorithms and analyzing their running times. It focuses on the particular algorithms for sorting, searching, set manipulation, arithmetic, graph problems, pattern matching. Methods for showing lower bounds on computational complexity will be discussed.

Prerequisite – CSC 122

#### CSC 325 Operating Systems (3 Cr.)

This course provides the fundamental principles of operating system design and implementation. The two fundamental tasks of an operating system – to manage a computer's resources and to provide applications with an abstract interface to these resources will be discussed. This course focuses on major OS subsystems: process management, memory management, file systems, and operating system support for distributed systems.

Prerequisite - CSC 122

#### CSC 327 Data Structure (3 Cr.)

The course provides the concept of data abstraction and the problem of building implementations of abstract data types. It focuses on logical structures of data, their physical representation, design and analysis of algorithms operating on the structures, and techniques for program development and debugging.

Prerequisite – CSC 122

#### CSC 331 Computer Architecture (3 Cr.)

This course presents the structure and behavior of the various functional modules of the computer with respect to hardware design and instruction set architecture. It also explores the interface between a computer's hardware and its software as well as provides system-level context for students interested in emerging technologies and digital circuits.

Prerequisite – CSC 122

### CSC 332 Data Communication (3 Cr.)

This course introduces the basic concepts, theories and components in data communications such as protocols, network equipment and the infrastructure. It covers the design and evaluation of computer networks using current trends in hardware and software. Topics include data transmission, signal encoding techniques, digital data communication techniques, optical fiber communications.

Prerequisite – CSC 122

#### CSC 345 Computer Graphics (3 Cr.)

This course provides students the basic concepts necessary for successful use of the computer as a graphic tool. It covers topics such as survey of the applications of computer graphics, video games, the renderers behind Hollywood's special effects, graphics art and design, 2-dimensional and 3-dimensional display techniques and an examination of computer graphics technologies.

Prerequisite - CSC 122

## CSC 365 Programming Hand Held Devices (3 Cr.)

This course covers Android/IOS programming. The major topics include: GUIs, layouts, menus, resource files, events, touch/gesture processing, accelerometer and motion event handling, images, video, audio, graphics, animation, maps, geo-location, threading, web services, timers, supporting various screen sizes/resolutions, and more. We will write Apps for Android phones/watches, iPhone, and Apple Watch.

Prerequisite – CSC 122

#### CSC 368 Web Programming (3 Cr.)

This course presents and applies the web programming languages (HTML, DHTML, Javascript, Coldfusion), tools, and techniques used to develop professional web sites. The course moves step-by-step through the processes involved in planning, designing, launching, and maintaining successful web sites, with an emphasis on teamwork.

Prerequisite – CSC 122

#### CSC 417 Object-Oriented Programming (3 Cr.)

Advanced use of an object-oriented programming language in the implementation of object-oriented systems. The language is studied in depth to see how advanced concepts are realized in the language, and is used to produce example systems. Emphasis is placed on the most recent advanced features.

Prerequisite – CSC 122

## CSC 420 Image Processing (3 Cr.)

This course introduces principle techniques and fundamental algorithms used to manipulate digital image imagery in the spatial and frequency domains. Topics covered in this course include: image sampling, quantization and representation, image enhancement (histogram equalization), filtering (sharping, blurring and noise), image transformation, segmentation and color. Several assignments will be given requiring students to process digital images using techniques discussed in class. Software used in this course includes the use of Python and MATLAB.

Prerequisite - CSC 122

#### CSC 433 Information Retrieval (3 Cr.)

Information retrieval is the identification of textual components, be them web pages, blogs, microblogs, documents, medical transcriptions, mobile data, or other big data elements, relevant to the needs of the user. Relevancy is determined either as a global absolute or within a given context or view point. Practical, but yet theoretically grounded, foundational and advanced algorithms needed to identify such relevant components are taught.

Prerequisite – CSC 122

## CSC 511 Computer Architecture (3 Cr.)

This course provides an understanding of modern computing technology through an in-depth study of the interface between hardware and software. It demonstrates the computer architecture from the application programs down to the hardware levels. Topics covered are applications of digital logic circuits, register transfer logic and assembly language to the design and operation reviewed.

Prerequisite – Permission from Instructor

#### CSC 512 Operating Systems (3 Cr.)

This course introduces the facilities provided in modern operating systems. It examines the issues in operating system design and implementation such as inter-process communication, process scheduling, deadlock, memory management, virtual memory, file systems and distributed systems. Particular emphasis will be given to the major OS subsystems.

Prerequisite – CSC 511

#### CSC 513 Data Structure (3 Cr.)

This course covers data structures and associated algorithms that allow complex tasks to be solved in simple and elegant ways. It focuses on program design and organization ideas such as abstract data types, data structures and object-oriented programming. Topics include are: lists, stacks, queues, heaps, dictionaries, maps, hashing, trees and balanced trees, sets, and graphs.

Prerequisite – CSC 511

## CSC 514 Database Theory (3 Cr.)

This course provides the understanding of the fundamentals of relational systems including data models, database architectures, and database manipulations. The main subjects of the course include the understanding of relational database theories, industry standard SQL, and database design. A conceptual/semantic data modeling with the entity-relationship diagramming technique is also covered.

Prerequisite – Permission from Instructor

#### CSC 521 Artificial Intelligence (3 Cr.)

This course is an introduction to the basic principles, techniques, and applications of Artificial Intelligence. It focuses on the materials on AI programming, logic, search, game playing, machine learning, natural language understanding, and robotics introduce the student to AI methods, tools, and techniques, their application to computational problems.

Prerequisite – CSC 511

#### CSC 537 Data Communications (3 Cr.)

This course provides the foundation for work in data communications and local area network management. It focuses on the primary aspects of data communications networking, including a study of the Open Systems Interconnection (OSI) and Internet models. Topics include in this course are: data transmission principles, media, major protocols, topologies, routing methods, introduction to networking principles, and Network operating system management fundamentals.

Prerequisite – CSC 511

#### CSC 540 Programming Languages Principles (3 Cr.)

This course presents the principles of programming language design, and programming in multiple paradigms, including functional programming, logic programming and object-oriented programming. It focuses on programming language specification and semantics such as language models, functional, object-oriented, logic, string, and concurrent programming.

Prerequisite – Permission from Instructor

#### CSC 543 Software Engineering (3 Cr.)

This course covers the software engineering methods and tools used for systematic development of software products. It focuses on the software development process, from requirements initiation and analysis, through specification and design, to implementation, integration, testing, and

maintenance. It also provides a solid introduction to design patterns: their usage, benefits and implementations.

Prerequisite – CSC 540

## CSC 545 Programming Languages Topic: Java (3 Cr.)

This course provides an overview to basic concepts and techniques of programming in Java, It focuses on the fundamental areas of software development: syntax, control-flow mechanisms, keyboard and mouse interactions, object modelling, and debugging. Topics covered include the Java language syntax, object oriented programming using Java, exception handling, file input/output, threads, collection classes, and networking.

Prerequisite – CSC 540

#### CSC 552 Computer Graphics (3 Cr.)

The course is an introduction to theory and praxis of computer graphics. It covers the fundamental concepts and terminology for creating and editing basic electronic paint and draw-type graphics. It introduces techniques for 2D and 3D computer graphics, including modeling and representation, illumination and shading, rendering, texturing, and advanced software tools.

Prerequisite – CSC 511

## CSC 553 Digital Electronic (3 Cr.)

This course covers the principles of digital electronics and the electronic circuits that are used to process and control digital signals. It focuses on the design process of combinational and sequential logic design, engineering standards, and technical documentation. Topics include are: Boolean algebra, basic gates, logic circuits, flip-flops, registers, arithmetic circuits, counters, interfacing with analog devices, and computer memory.

Prerequisite – CSC 511

## CSC 561 Man-Machine Studies (3 Cr.)

This course explores the new forms of human-computer interaction based on measurement of brain function and properties. It also introduces methods for extracting rules or learning from data and analysis of integrated man-machine systems. Basics of both supervised and unsupervised learning paradigms will be covered in this course.

Prerequisite – Permission from Instructor

#### **Economic**

#### ECO 201 Principles of Microeconomics (3 Cr.)

This course provides analysis of the behavior of individual economic agents. It introduces the terminology and analytic principles used in microeconomics, which is broadly defined as the study of markets, and to the application of these conceptual tools to several policy issues. It focuses on microeconomic issues and problems, such as competition and monopoly, pricing, consumer demand, and producer supply.

No prerequisite.

## ECO 202 Principles of Macroeconomics (3 Cr.)

This course introduces economics which focuses on the aggregate behavior of households, firms and the government. It focuses on supply, demand, business organization, income, social security, management-labor relations, taxation, money and banking, consumption, savings and investments. Economic development, globalization, and the role of international lending institutions will also be discussed.

No prerequisite.

#### **ECO 307 The Global Economy**

This course aims to deepen your understanding of real world economic issues, while providing you with a stronger analytical base. We will focus on international trade theory and policy, and issues in international finance.

Prerequisite – ECO 201, 202

#### ECO 540 Climate Changes and Economy (3 Cr.)

This course examines the science on climate change and its impacts and alarming prospects for global economics and politics. It presents the connection between human activity and the current warming trend which influence the potential social, economic and environmental consequences of climate change. Key concepts of climate-change including decision-making in the face of risk and uncertainty, and the management of global public goods will be covered.

Prerequisite - Permission from Instructor

## ECO 533 International Economics (3 Cr.)

This course provides a broad overview of international trade theory, policy, and international finance. Topics covered are: global trade protectionism, gains from trade and their distribution; pre-determined trade barriers; the trade deficit; currency exchange rate war; and government intervention in foreign exchange markets.

No prerequisite.

#### **English**

#### ENG 111 College English I (3 Cr.)

This course incorporates reading, research and critical thinking of the college level student. It focuses on skills required for effective writing in a variety of contexts, with emphasis on exposition, analysis, and argumentation, and also includes introductory use of a variety of research skills.

No prerequisite.

## ENG 112 College English II (3 Cr.)

In this continuation of College English I, it enhances students' ability to read and think critically, to research and evaluate evidence competently, and to write clearly. Students will continue practice of expository writing in three genres of literature, including drama, poetry, and short fiction, and culminating in a research paper.

Prerequisite – ENG 111

#### ENG 113 Introduction to Speech (3 Cr.)

This course introduces speaking skills, including the selection, preparation, and delivery of speeches for various audiences and situations. It also addresses particular issues associated with public speaking, such as listening skills, interpersonal, and public communication, audience analysis as well as self and peer evaluations.

No prerequisite.

#### **Finance**

## FIN 201 Introductory Finance (3 Cr.)

This course provides an introduction to the basic concepts and principles of finance. It examines financial concepts and analytical techniques, capital structure, financial performance, short-term financial planning, time value of money, measurement of risk and return, capital budgeting. Value assets and businesses given forecasts of future cash flows will be covered.

No prerequisite.

#### FIN 267 Personal Finance (3 Cr.)

This course teaches students to negotiate the retail financial landscape, emphasizing issues that have a large impact on their future financial well-being. It covers topics such as understanding and appreciating the time value of money, the financial planning process, financing the purchase of a house and other consumer loans, saving for retirement and other goals, selecting a financial advisor, taxes, estate planning, behavioral finance and common investment scams.

Prerequisite - FIN 201

#### FIN 301 Regulation of Capital Markets and Financial Institutions (3 Cr.)

This course introduces the regulation of financial markets and the role that financial institutions. It examines important current issues in the regulation of the U.S. capital markets and potential future actions. It analyzes the financial disclosure requirements of non-financial corporations and the impact of these requirements on corporate policies.

Prerequisite - FIN 201

#### FIN 333 Financial Quantitative Methods (3 Cr.)

This course covers statistical methods and mathematical models for forecasting future market movements. The objective of this course is to use economic theories and quantitative methods for investments that have wide applicability in business and financial decision making. It prepares students to develop the theoretical knowledge and practical skills required for successful working with multiple types of risks in modern financial markets

Prerequisite – FIN 201

## FIN 352 Security Valuation (3 Cr.)

This course is designed for students interested in investment banking, fixed-income valuation or equity analysis. Students develop tools and techniques for the valuation of different securities. Topics covered include: bond pricing, bond duration, the term-structure of interest rates, financial statement analysis, equity valuation models, and firm valuation.

Prerequisite - FIN 201

#### FIN 356 Financial Capital (3 Cr.)

This course discusses the available corporate securities that firms can use to finance investment. The different kind of securities covered include corporate and junk bonds, bank loans, common and preferred equity, commercial paper, securitization Topics include are the design of these securities, the issuing process for these securities, the underwriting process, the pricing of these securities and the cost of capital.

Prerequisite - FIN 201

## FIN 380 Introduction to Entrepreneurship

This course introduces the role of small business in contemporary society and how small business organization and management with an emphasis on the marketing mix. It provides exposure to the stresses of a start-up business, the uncertainties that exist, and the behavior of entrepreneurs. The route from consider legitimate ideas oriented towards the formation of an enterprise will be discussed.

Prerequisite - FIN 201

#### FIN 411 Investment (3 Cr.)

This course provides empirical evidence when making investment decisions. It covers portfolio theory, equilibrium models of security, market efficiency, intrinsic value and risk, the empirical behavior of security prices, venture capital, performance evaluation and behavioral finance. Domestic and international financial markets will be discussed.

Prerequisite – FIN 201

#### FIN 420 Real Estate Finance (3 Cr.)

This course covers investment and financing issues in real estate as well as real estate knowledge. It focuses on understanding, calculating, and analyzing potential cash flow, tax, and future benefits of real estate asset. It also emphasizes the entrepreneurial management style and risk analysis techniques used by successful investors and developers.

Prerequisite – FIN 201

#### FIN 422 Corporate Finance (3 Cr.)

This course provides the fundamental concepts, principles and approaches of corporate finance and practice of decision-making within the corporation. It covers the analytical skills for making corporate investment and financial decisions and risk analysis. Topics covered include the concepts of present value and the opportunity cost of capital, discounted cash flow analysis and other valuation techniques.

Prerequisite - FIN 201

#### FIN 423 International Trade (3 Cr.)

This course provides the characteristics of international financial markets and evaluates the risks and benefits involved in operating globally. It focuses international finance from both corporate and international banking viewpoints. It also covers pricing in the foreign currency, market efficiency in the international money markets, foreign currency options and international capital asset pricing.

Prerequisite – FIN 201

#### FIN 439 Behavioral Finance (3 Cr.)

In this course we will examine how individuals and firms make financial decisions, and how those decisions may deviate from those predicted by traditional financial theory. We will explore psychological biases in financial decision making, and examine the impacts these biases have on financial markets and financial decision making.

Prerequisite - FIN 201

## FIN 500 Financial Management (3 Cr.)

This course examines the general nature of financial management and focuses in corporate finance. It presents the necessary tools required to objectively approach and solve financial problems as well as enhances the understanding of basic financial theory and practices. It also discusses the topics such as capital budgeting, capital structure and working capital decisions.

No prerequisite.

#### FIN 506 Financial Statement Analysis (3 Cr.)

This course provides students with tools to analyze and exploit information in corporate financial statements. It helps students with understanding and analysis the corporate issues on financial reporting strategies effectively. It also covered include financial distress prediction, the impact of accounting information on security returns and the evaluation of short-term and long-term loan requests.

Prerequisite – FIN 500

## FIN 517 Financial Theory (3 Cr.)

The course introduces the functions of public and private financial institutions. It focuses on classical ideas in finance, such as expected utility, risk aversion, mean - variance portfolio analysis, separation thermo, state prices and risk neutral valuation, efficient market. It also provides specific technical knowledge of financial decision-making at these institutions.

Prerequisite – FIN 500

#### FIN 534 Financial Institutions and Markets (3 Cr.)

This course introduces the structure and functions of financial institutions and markets in the United States. It covers topics such as the money market and short-term money management; the equity and bond markets; financial assets and the primary market; and the difference between electronic and floor-based equity markets.

Prerequisite – FIN 500

#### FIN 551 Portfolio Management (3 Cr.)

This course provides an introduction to the tools needed to enter the field of professional money management. It covers the theory and practice of money management and analysis of the theory and practice involved when securities are combined into portfolios. Modern portfolio theory, such as market efficiency and behavioral finance will be included.

Prerequisite – FIN 500

#### FIN 552 Investment Analysis and Management (3 Cr.)

This course is a survey course of investments including corporate and government securities, real property and financial intermediaries. It examines investment policies, timing purchases and sales, types of securities, factors that influence pricing changes. The study of investment pricing techniques and of the institutional background will be covered.

Prerequisite – FIN 500

#### FIN 562 Entrepreneurial Finance (3 Cr.)

This course is designed to help entrepreneurs and financiers make better investment and financing decisions. It focuses on the financial aspects of the management of small business and entrepreneurial firms and analyzes principles of corporate finance, valuation, and coordination and control of firms, with an eye toward developing the tools and concepts of entrepreneurial financial management.

Prerequisite – FIN 500

## FIN 599 Finance Project (3 Cr.)

The goal of this course is to make students acquainted with current problems in finance. It is designed to give students a survey of the current literature in the field of finance. It also provides a solid grounding in the financial key issues.

Prerequisite - Permission from Instructor

#### History

#### HST 111 Early American History (3 Cr.)

This course is the foundational American story from colonization through the Civil War and Reconstruction. It covers issues as race, war, gender construction, technology, and republicanism from different social and cultural points of view in the colonial, revolutionary and early national periods. Topics covered are environmental transformation, colonialism; immigration, economic development, slavery, ethnicity, practices of freedom and equality.

No prerequisite.

## HST 112 Islam and the Middle East (3 Cr.)

This is a survey course of Middle Eastern history until the end of the twentieth century and the emergence of Islam in the region in the 7<sup>th</sup> century. It presents the encounters and exchanges between the Islamic world and the West. It focuses on the transformation of state and society under the impact of a changing world economy today.

No prerequisite.

#### HST 213 History of Traditional East Asia (3 Cr.)

This course introduces the constituent characteristics that originally linked East Asia as a region. It focuses on the development of the region from the mid-nineteenth century until the end of the twentieth century and the impact of the West and China in this region. Nationalism and industrialization of China, Japan and Korea will be covered.

No prerequisite.

#### **Information Systems**

#### IFS 101 Information Systems Principles (3 Cr.)

This course emphasizes the use of information technology to develop distinct the competitive potential for strategic use of information systems with competitors, customers and suppliers with respect to products and services. It also examines strategies of actual companies and identifies other strategies that can be deployed to gain competitive advantage.

No prerequisite.

#### IFS 220 Information Policy (3 Cr.)

This course provides an introduction to the conceptual, institutional, historical, and legal foundations of contemporary information and communication policy. Current US Government policies in areas involved with information and information technology will be examined as well as the associated issues of ethical uses of information and of privacy considerations.

No prerequisite.

## IFS 337 Principles of Decision Making (3 Cr.)

This course is designed to make student a better decision maker with better decision-making skills by providing strategies for further improvement in the future. It covers decision making and problem solving processes in organizations, utilizing logical and creative problem solving techniques. It also presents formal, optimal models and psychological, descriptive models to help student understand decision making abilities.

Prerequisite – IFS 101

#### IFS 377 Data Mining (3 Cr.)

This course covers data mining concepts, techniques, and software utilized in the overall process of discovering knowledge within data. It presents intelligent analysis of information stored in data sets that deals with extracting useful knowledge from raw data. The knowledge discovery process includes data selection, cleaning, coding, using different statistical and machine learning techniques.

Prerequisite – IFS 101

#### IFS 381 Business Process Management (3 Cr.)

Modeling business work systems with focus on processes and the information technology (IT) to support business processes. The focus is on using IT to create, automate, and integrate business processes. Major topics covered: modeling work systems, major business processes and their relationships, modeling tools, business process/application integration approaches, creating and managing a business process using business process management software.

Prerequisite – IFS 101

#### IFS 411 Cyber Security (3 Cr.)

This course presents all functional levels within the enterprise to deliver information system security. It provides the technical and analytical skills to implement computer security. It covers topics such as technical, analytical, and communication skills, further engaging students in the practice of cybersecurity. It also focuses on multiple cybersecurity environments, technologies, processes, and concepts.

Prerequisite – IFS 101

#### IFS 427 The Laws in Cyber Space (3 Cr.)

This course covers the essentials of computer and network technologies and it explores specific problems in applying law to cyberspace. It explores the sources of Internet law from intellectual property to tort and the legal complexities. Topics such as intellectual property, privacy, content control and the bounds of jurisdiction will be covered.

Prerequisite – IFS 101

#### IFS 435 Cyber Intelligence (3 Cr.)

This course covers intelligence and how it relates to both the physical and cyber domains. It also presents the techniques of computational intelligence, especially evolutionary computation and neural networks and how it enhances human decision making and learning and the automation of computing processes .It also focuses on the development of human source intelligence as a discipline.

Prerequisite – IFS 101

#### IFS 439 Business Intelligence (3 Cr.)

Business intelligence provides the highest level of information support to aid the manager in the decision-making process. This course provides the skills necessary to conceptualize, build, and implement systems utilizing business intelligence in organizations.

Prerequisite – IFS 101

#### IFS 442 Software Engineering (3 Cr.)

This course covers the nature of software and software projects, software development models, software process maturity and project planning. It presents the fundamental concepts and principles that underlie current and emerging methods, tools, and techniques for the cost-effective engineering of high-quality software systems.

Prerequisite – IFS 101

#### IFS 444 Systems Analysis and Design (3 Cr.)

Emphasis on development of business application systems using object-oriented and structured analysis tools and techniques for describing processes, use cases, data structures, system objects, file designs, input and output designs, and program specifications. Includes a service-learning project with requirements gathering, planning, and development of a prototype for an internal/external client.

Prerequisite – IFS 101

## IFS 500 Information Technology for Managers (3 Cr.)

This course presents an introduction to information systems and dominant supportive technologies. It explores necessary management actions to use of the best practices and methods such as: information systems architectures, software and hardware standards, database management systems, transaction processing, e-commerce, for improvement for already in place.

Prerequisite – Permission from Instructor

#### **Legal Studies**

#### LAW 510 Law and Legal Reasoning (3 Cr.)

This course introduces the American legal system and the types of legal reasoning used by lawyers and judges. It covers the nature, function and application of the U.S. legal system as it applies to the modern business environment. It also examines the American legal system's role in the development and growth of business with an emphasis on ethics and business decision making.

Prerequisite – MGT 500

#### Mathematics

#### MAT 103 College Algebra (3 Cr.)

This course provides a solid foundation in algebraic operations such as linear, quadratic, polynomial, rational, inverse, exponential and logarithmic functions. It also covers topics as solve equations involving these functions, and systems of linear equations in two variables, as well as inequalities.

No prerequisite.

#### MAT 114 Mathematics for Computer Science (3 Cr.)

This course is an introduction to the mathematics underlying computer science. It covers fundamental concepts and tools in discreet mathematics with emphasis on their applications to computer science. It covers topics like logic and Boolean circuits; sets, functions, finite automata, randomized algorithms, and analysis techniques.

No prerequisite.

#### MAT 231 Calculus (3 Cr.)

This course is an introduction to calculus which examines polynomial, rational, exponential and trigonometric functions and their transformations. Those in integration include the area under a curve, definite and indefinite integrals, numerical integration, substitution and applications of integration. Topics include: limits, the rate of change of a function, derivatives of algebraic and trigonometric functions, applications of derivatives and integration.

Prerequisite – MAT 103

#### Management

#### MGT 201 Principles of Management (3 Cr.)

This course focuses on the theory and fundamental concepts of management including planning, organization, leadership, and control. It presents the management role and its practices and

techniques. Various dimensions of management, organizational structure and functions of managers, growth and re-engineering of business will be covered.

No prerequisite.

## MGT 300 Strategic Planning (3 Cr.)

This course introduces basic concepts of strategic planning and management. It provides an overview and applications of strategic planning theories, methods, and group processes in different organizational environments. It helps organizations formulate a strategy on how to best achieve their goals and define an operational plan.

Prerequisite - MGT 201

#### MGT 312 Human Resource Management (3 Cr.)

This course presents essentials of human resources management principles and practices in business and industry. It analyzes the policies and practices used by human resource management staff to build and maintain an effective work force. Topics include human resource planning, labor relations, job analysis, manpower development, recruitment, selection, performance appraisal and compensation.

Prerequisite – MGT 201

## MGT 313 Teams, Groups and Leadership (3 Cr.)

The course evaluates several leadership issues including power, authority and influence, team building and coalitions and ethics and values. It examines components that comprise teams, highlights key factors that influence team effectiveness, skills in diagnosing opportunities and threats that face teams. It also focuses on identifying and developing workplace leadership skills.

Prerequisite - MGT 201

#### MGT 412 Managerial Psychology (3 Cr.)

This course focuses on interpersonal effectiveness about understanding and managing behavior in the work environment. It presents the theoretical background for practical tasks solving while working with diverse groups of people. It covers topics like ethics and confidentiality, assessment, crisis intervention, treatment planning, counseling, case management, record keeping and consultation.

Prerequisite - MGT 201

## MGT 431 Project Management (3 Cr.)

This course develops a foundation of concepts and solutions that supports the planning, scheduling, controlling, resource allocation, and performance measurement activities required for successful completion of a project.

Prerequisite - MGT 201

#### MGT 445 Small Business Management (3 Cr.)

This course reviews considerations faced by an individual planning to establish and manage a small business venture in today's complex business environment. It includes a review of legal forms of ownership, financial planning and resources, considerations of management, operations and control, ethical issues, and the importance of social responsibility.

Prerequisite - MGT 201

#### MGT 450 International Management (3 Cr.)

This course focuses on opportunities and challenges created by globalization and the management issues related to management in an international marketplace. It explores the opportunities and problems that confront international managers through complex and ever-changing global economic, political, legal, technological and cultural environment.

Prerequisite - MGT 201

## MGT 472 Operations Management (3 Cr.)

This course introduces the concepts, principles, problems, and practices of operations management by covering both service industries and manufacturing. It focuses on the designing, planning, organizing, operating and controlling of operating systems. It also covers managerial processes for effective operations in both goods-producing and service-rendering organization.

Prerequisite – MGT 201

#### MGT 500 Principles of Management (3 Cr.)

This course presents fundamentals and concepts of management, administrative policies, objectives and procedures and problem of organization and leadership. It covers various concepts of management including management controls, operations management, and human resource management. It also provides various concepts required for an overall understanding of management's role in the contemporary organization.

Prerequisite – Permission from Instructor

#### MGT 520 Human Resource Management (3 Cr.)

This course presents the human resources function within today's organizations, such as an organization acquires, rewards, motivates, uses, and generally manages its people effectively. It explores the role managers play in the successful management of the organization's human resources. It emphasizes the employee-supervisor relationship and applications involved in effectively managing people in organizations.

Prerequisite – MGT 500

#### MGT 522 Strategic Management (3 Cr.)

This course presents the strategic analyses, decisions and actions with the consideration of both the internal condition and the external environment. It examines management theory and practice through a framework involving strategic thinking and strategic planning. The context of strategy, leadership, managerial uses of structure and design and performance will be covered.

Prerequisite – MGT 500

## MGT 525 Organizational Behavior (3 Cr.)

This course covers the analysis and application of organizational theory, group dynamics and the integration of interdisciplinary concepts from the behavioral sciences. It focuses on individual behavior and impact of work teams in an organization. Topics include development, structure, leadership, decision making, power and conflict will be discussed.

Prerequisite – MGT 500

## MGT 531 Business Intelligence (3 Cr.)

This course provides an introduction to business intelligence, including the processes, infrastructure, methodologies and current practices used to transform business data into useful information and support business decision-making. It focuses on the features, uses, and design strategies for IT-enabled managerial decision support.

Prerequisite – MGT 500

## MGT 544 Managerial Psychology (3 Cr.)

This course presents the theoretical, methodological and practical areas of managerial psychology and sociology. It covers the importance issues of leadership and what makes someone a successful leader. It addresses the behaviors and their influences on managerial thinking and business decisions. The difference between leadership and management will be discussed.

Prerequisite – MGT 500

#### Marketing

#### MKT 201 Marketing Principles (3 Cr.)

This course presents the business functions of marketing – marketing mix, segmentation, targeting, positioning, customer value, branding and services. It focuses on the principles and problems of the marketing of goods and the methods of distribution from producer or manufacturer to the consumer. Market planning, market research and competitive analysis will be covered.

No prerequisite.

### MKT 307 Contemporary Globalization (3 Cr.)

This course focuses on the ideas, theories and issues about the understanding of contemporary globalization. It analyzes economic globalization in a historical perspective and the arguments of both its critics and advocates. It also covers the nature of globalization in relation to the emergence of a global economy, global cultures, politics and environmental issues.

Prerequisite - MKT 201

#### MKT 377 E-Commerce (3 Cr.)

This course introduces the realities and implications of e-commerce from a marketer's perspective. It presents the ways in which an enterprise can become technically and operationally proficient in e-commerce. It also presents concepts and skills for the strategic use of e-commerce and related information system technologies.

Prerequisite - MKT 201

#### MKT 510 Electronic Commerce Strategy (3 Cr.)

This course refers to corporations that have adopted e-commerce practices and designs. It explores of the basic notions of changes in technology and business models looking at internal as well as external factors. It also examines the digital economy and its impact on commerce by focusing on the operation within a business ecology framework.

Prerequisite - Permission from Instructor

## Philosophy

## PHI 201 Introduction to Western Philosophy (3 Cr.)

This course provides an overview of the history of western philosophy from its beginnings among the ancient Greeks through the 14th century. Particular emphasis is given to Plato, Aristotle, Augustine, and Thomas Aquinas. It is a survey course of several major areas of Western philosophy: metaphysics and epistemology, ethics, philosophy of mind, philosophy of language, philosophy of religion, and philosophy of science.

No prerequisite.

#### PHI 301 Logic (3 Cr.)

This course covers some basic rules, concepts, and skills of logic. It focuses on the symbolic logic, sentential and predicate logic. It also presents the evaluation of arguments, the basic principles of formal logic, and the evaluation of arguments. Special emphasis will be placed upon the logical appraisal of everyday arguments and the analysis of value arguments.

No prerequisite.

#### PHI 302 Ethics (3 Cr.)

This course introduces to philosophical ethics and ethical theory about the nature of morality. It covers the fundamental questions related to human conduct and the basis of moral rightness and moral wrongness. It presents an evaluation of classical and contemporary ethical theories concerning the good life, human conduct in society, morals, and standards of value.

No prerequisite.

#### **Political Science**

## POL 120 American Political Thought (3 Cr.)

This course is an introduction to American political institutions and behavior. It is a study of governmental politics, functions, and programs. It introduces the primary intellectual traditions and key political questions that have motivated and shaped American political thought. It also covers the public opinion, political culture, parties, and elections of the United States.

No prerequisite.

## POL 130 Climate Changes and International Politics (3 Cr.)

This course introduces the complex political phenomenon as climate change in decision-making in international society. It explores the difficulty to build collective action at the global level. It discusses possible avenues forward and the sources and impacts of climate change at international policies. It also covers the world's effort to effectively meet the prospect of catastrophic climate change.

No prerequisite.

#### **Natural Sciences**

## SCI 124 Introduction to Chemistry (3 Cr.)

A study of the fundamental principles of chemistry emphasizing modern atomic theory, the structure and behavior of atoms, the properties and states of matter, energy relations, periodicity and mole concepts. Topics includes the concept of energy and its uses, gas laws, kinetic molecular theory, laws of chemical combination, atomic and molecular structure, periodic classification of the elements, and chemical bonding.

No prerequisite.

#### SCI 134 Introduction to Biology (3 Cr.)

This course introduces to basic principles of biology in the areas of cell biology, genetics, development, vertebrate physiology, ecology and evolution. Functions of cellular organelles, including protein synthesis, genetics, cellular respiration, and cell reproduction will be emphasized. Topics include chemistry of living organisms, cell structure and function, energy and

its transformations, cell division process, genetics and review of current biology research will be covered.

No prerequisite.

#### SCI 144 Introduction to Physics (3 Cr.)

This course covers an introduction to fundamental principles of mechanics, waves, heat, electricity and magnetism, light, atomic and nuclear physics are covered. This course provides a conceptually-based exposure to the fundamental principles and processes of the physical world. Topics include basic concepts of motion, forces, energy, heat, electricity, magnetism, and the structure of matter and the universe.

No prerequisite.

#### SCI 154 Introduction to Geology (3 Cr.)

This course is a general survey of the rocks and minerals composing the earth. It focuses on the chemistry and properties of minerals, the composition of igneous, sedimentary and metamorphic rocks. It examines the common rock-forming minerals and their properties, different geologic environments, plate tectonics and other issues related to geology.

No prerequisite.

## SCI 164 Introduction to Environmental Science (3 Cr.)

Introduction to the ecological foundation of environmental systems, the ecological impacts of environmental degradation by humans, and strategies for sustainable management of environment and natural resources. The course addresses problems related to human society and explores possibilities for alleviating these problems. The course will provide the student with knowledge of how the environment functions and understanding of the issues of scale, complexity and conflict resolution.

No prerequisite.

#### Social Sciences

#### SOC 300 Social Psychology (3 Cr.)

This course introduces the scientific study of how individuals think, feel and behave in social situations. It covers topics such as the social self-concept, social judgment, attitudes, persuasion, conformity, aggression, helping behavior, prejudice, and interpersonal relationships as well as some of the most important theories and research in the field of social psychology.

No prerequisite.

#### SOC 313 Law and Society (3 Cr.)

This course introduces a wide variety of topics related to law's varying functions in a society. It focuses on social and legal theory and analyzes law and legal institutions especially in relation to equality, justice, and fairness. It also examines the importance, influence and impact of law in society as well as the impact of people on the law.

No prerequisite.

#### **Statistics**

#### STA 201 Introduction to Statistics (3 Cr.)

This course provides the student with an understanding of using descriptive and inferential statistical techniques for solving business and technical problems. It covers sampling distribution, analyzing, presenting numerical data, frequency and sampling distributions, averages, dispersion, hypothesis testing confidence intervals, hypothesis testing, simple regression and time series.

No prerequisite.

## **English Proficiency Program**

The purpose of Si Tanka University's ESL Program is to raise the student's English proficiency quickly, so that the student can enroll in regular credit-earning university courses. The ESL program is designed to improve the full range of English language skills: reading, writing, speaking and listening.

The STU College-level English as a Second Language (ESL) Program offers a series of courses for college-bound students whose native language is not English. These courses are designed to help students who already have a basic level of English skills gain academic English language proficiency to help them be successful in college study.

All English language learners can be assigned a level of English proficiency based on their ability to speak and understand English. These levels are determined at the time of entrance into the University. The proficiency levels reflect the abilities and skills that students are capable of demonstrating at each level. Course completion is graded "Satisfactory"/ "Unsatisfactory".

#### Level 1:

## ESL 010 - Beginner Speaking & Listening

Prerequisite: None. This course will enable students to use linguistic forms accurately, meaningfully, and appropriately, emphasizing conversational skills: listening and speaking in small groups, using new grammar structures, learning new words and expressions, comprehending and using idiomatic expressions.

#### ESL 012 - Beginner Reading and Writing

Prerequisite: None. This course is designed to enable students to identify and use linguistic forms accurately, meaningfully and appropriately in written expression. The course focuses on simple and compound sentences, questions, modifiers, phrases, and verb tenses, especially simple present, simple past, and present progressive.

#### Level 2:

#### ESL 020 – High Beginner Speaking & Listening

Prerequisite: ESL 010. This course will enable students to use linguistic forms accurately, meaningfully, and appropriately, emphasizing academic listening and speaking skills: listening and speaking in small groups, listening to short lectures on academic topics, learning academic vocabulary and expressions, making presentations on new topics.

#### ESL 022 – High Beginner Reading and Writing

Prerequisite: ESL 012. The focus of the course is on creating effective sentences and paragraphs, including a review of grammar, punctuation and usage. The grammatical emphasis of this course

will be on present, past and future continuous tenses and modal usage. The lessons taught in this course will build on the skills developed in the prior series of ESL courses. It also has some emphasis on pronunciation, listening and speaking.

#### Level 3:

#### ESL 030 - Low Intermediate Speaking and Listening

Prerequisite: ESL 020. This course is designed to give advanced ESL students more practice using oral English. The emphasis is on small group work, problem solving, role plays, and informal discussion. Intensive practice in recognizing and pronouncing the sounds of American English with emphasis on words and phrases: stress, intonation, phrasing, reduction. Attention to individual as well as group priorities.

#### ESL 032 – Low Intermediate Reading and Writing

Prerequisite: ESL 022. The course is designed to enable students to use and interpret linguistic forms accurately, meaningfully, and appropriately in written expression. Classes will focus on writing simple and compound sentences in short paragraphs, on developing strategies for increasing reading comprehension and flexibility, on interactive reading, and on developing academic vocabulary. Students will develop cultural understanding and fluency through a variety of writing and reading tasks.

#### Level 4:

#### ESL 040 - High Intermediate Speaking and Listening

Prerequisite: ESL 030. This course focuses on improving student's ability to speak and to understand spoken English through a variety of listening, pronunciation, and speaking activities. Active participation in individual, pair, and group activities is required in each class session.

#### ESL 042 – High Intermediate Reading and Writing II

Prerequisite: ESL 032. This course is designed to enable students to use and interpret linguistic forms accurately, meaningfully, and appropriately in written expression. Classes will focus on writing simple, compound, and complex sentences in structured paragraphs, on developing 0

#### Level 5:

#### ESL 050 – Low Advanced Speaking and Listening

Prerequisite: ESL 040. This course provides a highly interactive class that develops low advanced speaking and listening skills such that students are able to carry out a variety of simple tasks in straightforward situations in English. Listening, critical thinking skills, and presentation skills are honed through targeted listening and speaking exercises. Students produce both oral and written work for assessment.

## ESL 052 - Low Advanced Reading and Writing

Prerequisite: ESL 042. The focus of this course is on creating effective sentences and paragraphs, including a review of grammar, punctuation and usage. The lessons taught in this course will build on the skills developed in the prior series of ESL courses.

#### Level 6:

#### ESL 060 – Advanced Speaking and Listening

Prerequisite: ESL 050. This course provides a highly interactive class that develops advanced speaking and listening skills such that students are able to speak with ease and poise when in most normal situations. Listening, critical thinking skills, and presentation skills are honed through targeted listening and speaking exercises. Students produce both oral and written work for assessment.

#### ESL 062 - Advanced Reading and Writing

Prerequisite: ESL 052, This course focuses on compound and complex sentences and short paragraphs, overview of the verb tense system in English, verb forms with gerunds and infinitives, verb forms in modifying phrases, and modals. This course also emphasizes analyzing grammar and meaning, detecting and correcting grammatical errors, and self-editing skills.

## Si Tanka University Report on Deferred Action August 2017

Si Tanka University enrolled 39 students (17 graduates and 22 undergraduates) during the period of April 1, 2017 to October 1, 2017. A list of students enrolled during this period is attached. We are using this time period as requested by the ACICS Council at its' August 2017 meeting.

A degree audit, for these students, was performed at the end of the Fall quadmester and complete reports for each student with their academic transcripts are attached. These reports contain all academic information about each individual student. Each report is divided into five sections: 1. Transfer credit information (number of credits transferred to STU and the institution(s) where these credits were earned), 2. New student orientation (mandatory), 3. Course requirements (minimum of 36 credits for graduate degrees and 120 credits for undergraduate degrees), 4. Cornerstone and concentration courses and 5. Extra course(s) which are not included in their degree requirements. These degree audits were prepared by the department chairs and were verified by the registrar. As part of the response to the ACICS Council's deferral action, five additional reports are included.

- 1. A "Withdrawn" report which contains information of all students who withdrew from a course(s).
- 2. An "Incomplete" report which contains information regarding all students who have received an incomplete grade(s).
- 3. A "Repeat" report which contains information of all students who have repeated a course.
- 4. An "Additional Credential" report which contains information of all students who earned an additional credential from Si Tanka University.
- 5. A "Transfer in Credit" report which contains information of all students who have transferred credits to Si Tanka University.

During this period, April 1, 2017 – October 1, 2017, no Si Tanka students changed programs nor were any placed on probation or suspended for not meeting the Si Tanka University SAP Policy.

After the conclusion of each quadmester, Si Tanka checks each student's record for SAP compliance. Should a student not be in compliance with the University's SAP policy, appropriate action will be taken. Any student not meeting the SAP policy will be called in for a meeting with their Academic Advisors. Should the non-compliance cause the student to be placed on probation or suspension, the student will be required to sign and date an Academic Probation/Suspension Success Contract outlining the rules of probation and/or suspension and that they have received this document. The document will also be signed and dated by the Dean of Academic Affairs. The student will be given a copy and a copy will be placed in the student's permanent file. For your reference, a copy of the document the student and Dean signed is attached.
